

Instructions for submission

Trial and error

Tell about a mistake you made as a medical professional. The purpose is to teach students that making mistakes is human, and we should admit our mistakes in order to learn and grow from them.

Start by describing the situation/mistake and evaluate on how it could have best been solved at that time.

End it with a lesson; what is your message to others and how should they try to avoid or solve problems/issues like these? What did you learn from your mistake and what do you want others to learn from your mistake?

Maximum amount of words: 300.

Submission

Please submit your column as a word-document via www.amsj.nl.
