

Instructions for submission

Changing Perspectives

In this topic, we would like to ask you to clarify a 'tradition' in medicine that recently left medicine or that should leave in the near future. Write down a short history about the rise and fall of for instance a certain treatment, disease/syndrome or diagnostics. For example, bedrest was a common treatment in the past, but is barely appropriate in the present.

Maximum number of images/pictures: 2.

If possible, use your own images/pictures instead of the internet.

Maximum amount of words: 200.

Please submit your column as a Word-document via www.amsj.nl.
