

Instructions for submission

Research Abroad

Many students had very great experiences during their research internship abroad. AMSj would like to ask these students to share their experiences in this column to inspire other students and to give an indication about performing research abroad.

General requirements:

- Maximum word count: 450
- Maximum amount of authors: 1
- Please mention your affiliations

Please submit a report that gives answers to the following questions:

- Introduce yourself and tell us where you went for your internship. What kind of internship was it and how long was your stay?
- Tell us more about the research project during your internship. What was the main subject? How did you perform your research? What were your methods and your results?
- How did you apply for this internship? Can you give information about how other students can apply for the same internship? Was there any competition during the selection process, and if so, how did you try to excel?
- Have you seen any differences regarding research, compared with the Netherland? For example, was it more difficult to perform research abroad due to different regulations in that country? If so, how did you manage this?
- What was the most important thing you have learned from your internship? What would you like to teach other students regarding going abroad?

Please submit your column as a Word-document via www.amsj.nl.
